

An aerial night photograph of the Masaryk University campus. The buildings are illuminated with warm orange and yellow lights, contrasting with the dark blue twilight sky. In the background, the city of Brno is visible, with its lights creating a glowing pattern against the dark landscape. The text 'MASARYK UNIVERSITY' is overlaid in large, white, sans-serif capital letters across the center of the image.

MASARYK UNIVERSITY

MASARYK UNIVERSITY

Brno | Czech Republic

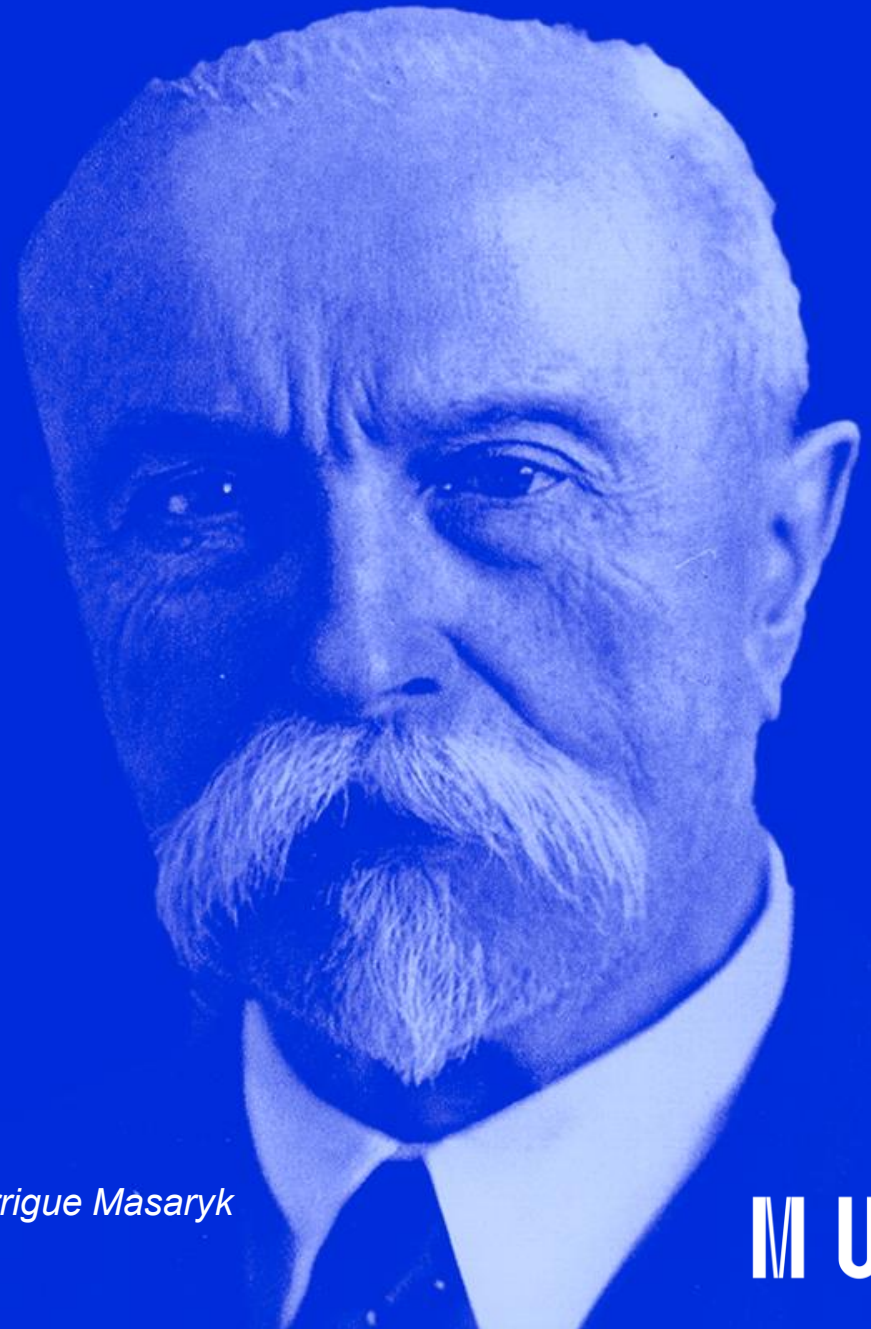

Who we are

We educate.

We conduct research.

We respond to social challenges.

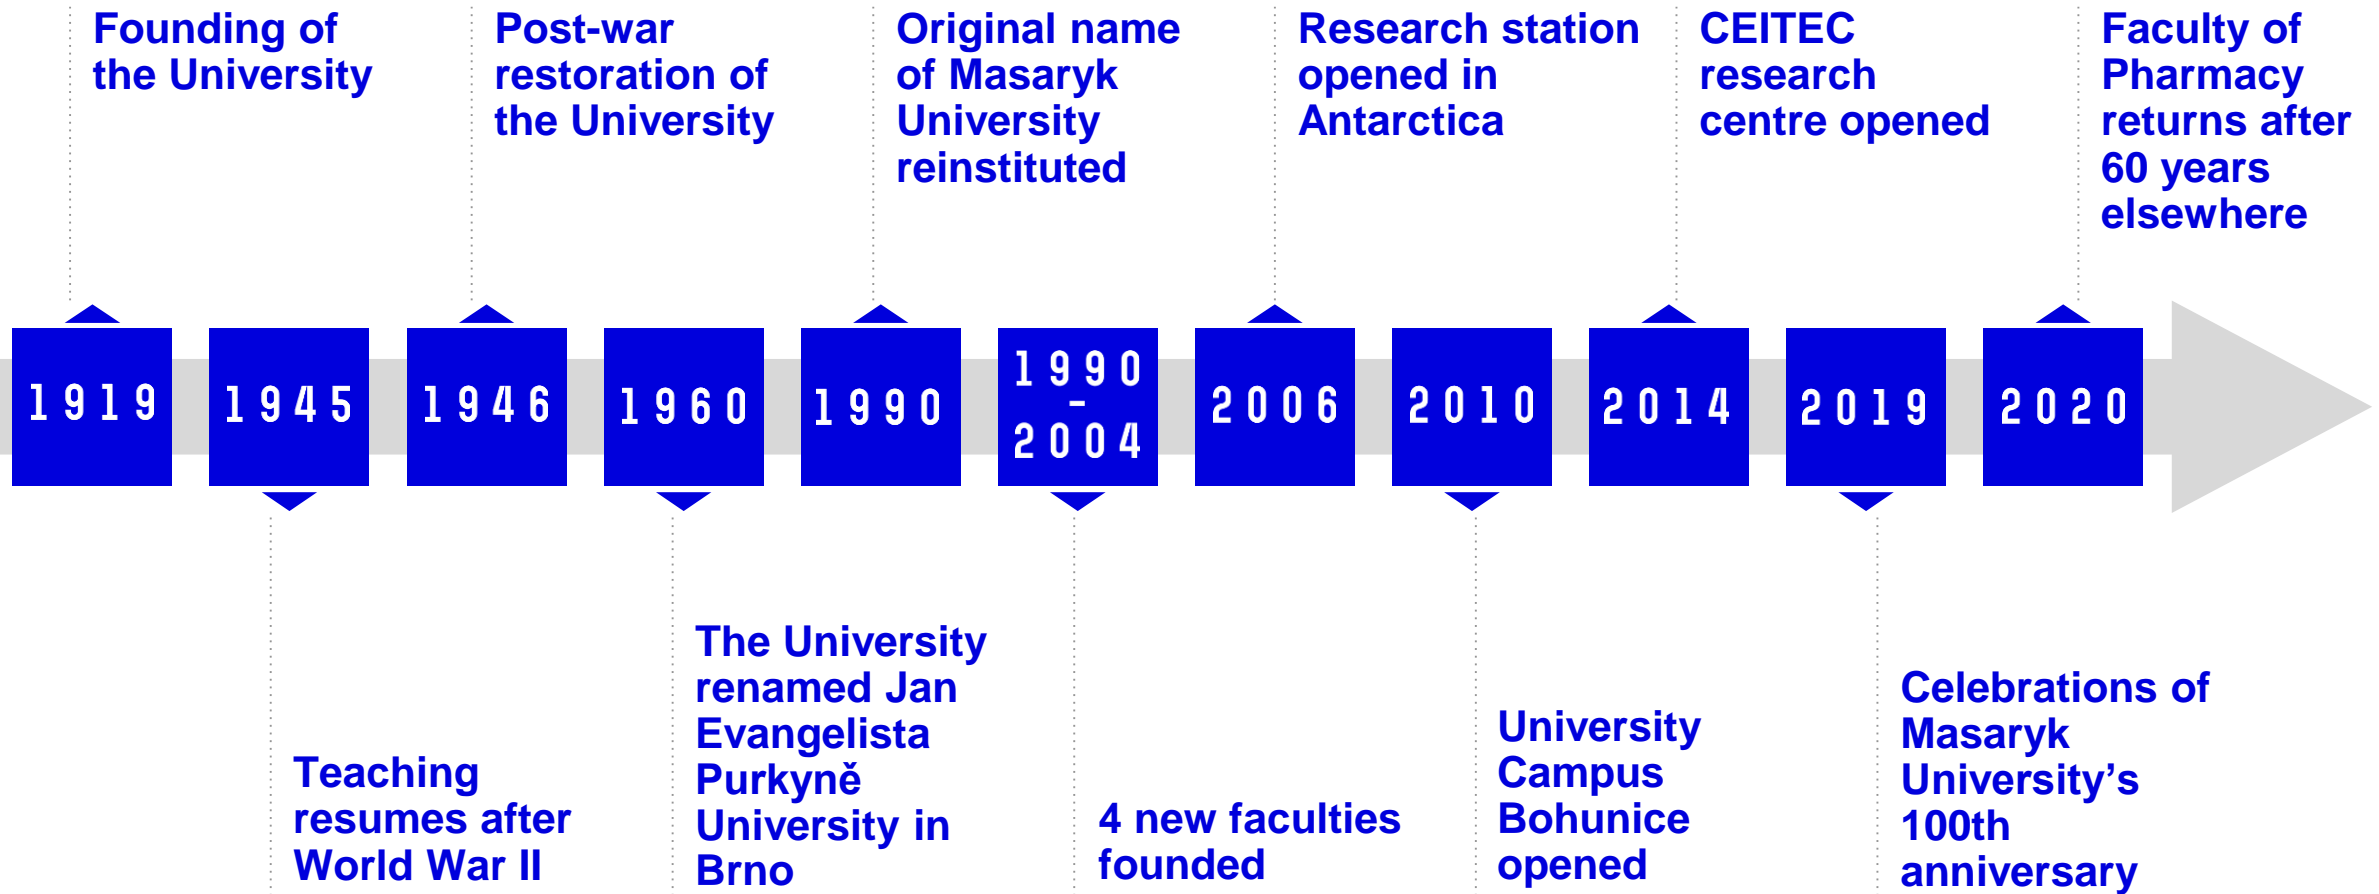

Since 1919 we've been changing
the world around us for the better.

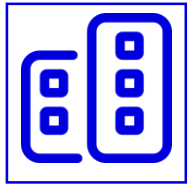

Tomáš Garrigue Masaryk

MUNI

The history of Masaryk University

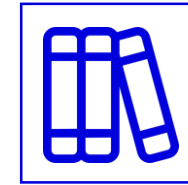

The year at Masaryk University

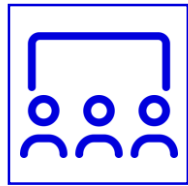

10
faculties

33,000+
students

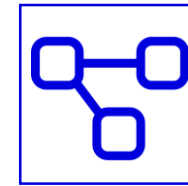

5,500+
publications

150+
programmes

7,000+
graduates

1,500+
projects

Teaching and researching at the largest university complex in Central Europe

We have built a new home for three faculties and two research centres

M²

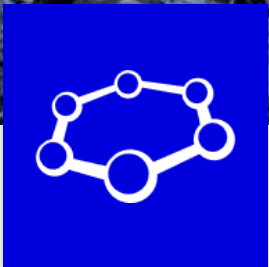

We have constructed 130,000 m² of teaching and research space

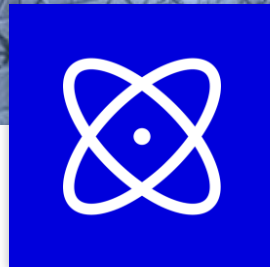

In building the University Campus, we have created a new attractive neighborhood

M U N I

Building a science and research centre

We operate the CEITEC research centre

We focus on the life sciences, advanced materials, and nanotechnology

We attract prominent international scientists to Brno and produce new generations of researchers

Internationally focused

We provide 7,000 international students an education and employ 300 international staff members

20 % of our accredited programmes are taught in English

We have signed 1,600 partnership agreements with universities all over the world

A university for life

600+

Every year we offer 600 lifelong learning programmes attended by 10,000 people

U3V

At the University of the Third Age we provide knowledge and skills to senior citizens

We provide training, courses, excursions, and seminars for companies and groups

MUNI

A leading regional employer

We employ 6,500
internal staff and 1,300
external staff

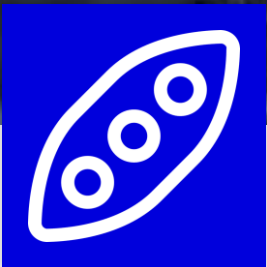

We foster the
professional and
personal development
and self-realization of
our employees

All 10 faculties have
received the
HR Excellence in
Research Award

Caring for the legacy of Gregor Johann Mendel

We operate the Mendel Museum, which tells the story of this genius and the principles of genetics

The J. G. Mendel Research Station in Antarctica honours Mendel's meteorological work

We invite prominent international scientists and Nobel Prize winners to give Mendel Lectures

Education

MUNI

Developing talent in future applicants

Through Masaryk Junior University we are opening up the academic world to elementary and secondary-school students

We offer advisors and laboratories for secondary-school students to conduct research

We offer trips, lectures, and workshops to students and get them involved in projects and contests

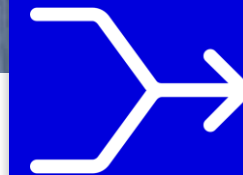

Unlocking academic potential

150+

We are a multidisciplinary university, offering more than 150 degree programmes

We allow students to personalize their studies and be flexible

We offer students the opportunity of choosing a major and minor field of study

Innovating teaching

1 6 0 0 +

Every year, more than 1,600 practising professionals are involved in teaching activities

S I M U

We are building a cutting-edge medical simulation centre for hands-on teaching

We expand students' knowledge through shared CORE courses

M U N I

Supporting students' and employees' language skills

We operate the largest language centre in the Czech Republic

#2050

The Czech Online project and the Centre for the Study of Multilingualism have been included in the #brno2050 strategy

The Language Centre heads a project focusing on preserving indigenous languages in Latin America

MUNI

Helping students discover the world

Through the Erasmus+ programme we have 1,400 agreements with more than 700 universities

We are a member of the prestigious EDUC (European Digital UniverCity) alliance

23%

International students make up 23 % of our student body

Preparing students for the real world

We help students launch their careers through the [Start Your Business](#) competition

We help students and grads find their first job on the [JobCheckIN](#) career portal

We organize events with companies and the [JobChallenge](#) job fair

Listening to what students have to say

We help students solve problems at all points in their studies

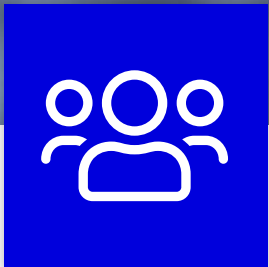

We offer academic and psychological counselling

We teach students how to apply effective study strategies

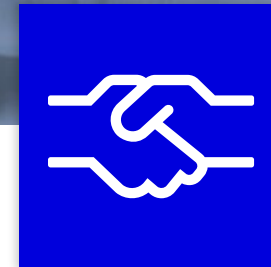

Supporting students with specific needs

We are a European leader in inclusive education

We provide services for students with specific needs

The Teiresias Centre offers special needs services to the public

Caring about research quality

Our teachers do not just pass on knowledge; they also develop students' skills

CERPEK

We develop our employees' teaching skills and other competences at the CERPEK centre

We are devoted to improving the skills of early-career teachers

Producing successful graduates on labour market

9 / 10

9 out of 10 graduates find a job or start a business right after graduating

8 / 10

8 out of 10 graduates find jobs in their field of study

1 / 3

One-third of graduates continue doing jobs they started during their studies

Science and research

MUNI

Working for a healthier future

RECETOX

At the RECETOX research centre we study the complex impact we have on our environment

In the Living Lab project, we examine factors affecting human health

Through the CZECRIN research infrastructure, we coordinate academic clinical research in the Czech Republic

MUNI

Developing an environment for cybersecurity training

KYPO

Through the KYPO cyber range we teach students and train professionals

We simulate advanced cyber attacks and practice how to defend against them

We offer KYPO as open-source software for research and education

Using sophisticated technology in humanities research

At HUME Lab we conduct experimental research in the humanities and social sciences

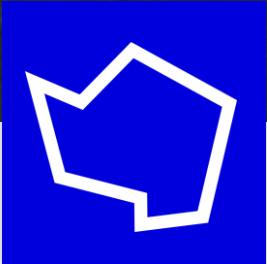

We support research on human cognition, behaviour, and social interactions

We are significantly contributing to progress in psychology, linguistics, and pedagogy research

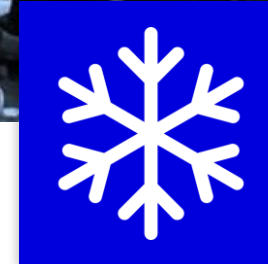

Contributing to studying Antarctica

We are the only university in the world overseeing a national research programme in Antarctica

We operate two bases that scientists in different fields can use

We are a member of key organizations coordinating scientific work in Antarctica

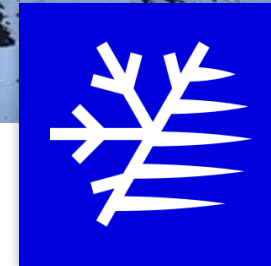

Testing in extreme polar conditions

We use the [J. G. Mendel Research Station](#) to test products for real-world applications

Scientists here test the durability of outdoor gear, the potential for using green sources of energy, etc.

Technologies and products we try out here can use the marketing label “[Tested in Antarctica](#)”

Putting knowledge and technology into practice

T T O

The Technology Transfer Office connects scientists with real-life applications

20+

We establish spin-off companies that use our findings to make products or offer services

We offer comprehensive technology transfer and intellectual property services

Attracting leading academics

MASH

5

We grant the MUNI Award in Science and Humanities to outstanding external researchers

We focus on both experienced researchers and young promising ones

Winners of this award can get up to 5 million crowns a year for a period of 5 years

MUNI

Our social role

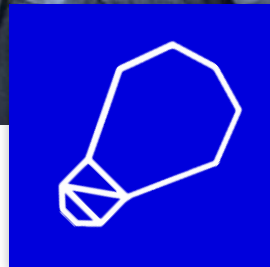

A black and white photograph of a large audience seated in a modern, curved auditorium. The audience is diverse in age and appearance, and many are looking towards the front of the room. The architecture features curved walls and a high ceiling with recessed lighting. The overall atmosphere is professional and engaged.

MUNI

Sharing knowledge

Every year we publish more than 400 academic and popular-science books

During Researchers' Night and at Science Slam we give the public a peek behind the scenes of research work

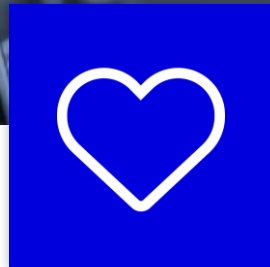

At the MUNI Archives we take care of the University's history

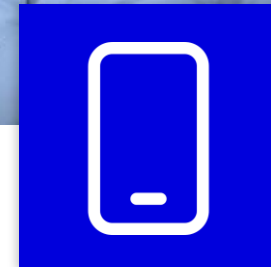

We help, therefore we are

We were one of the first universities to establish a volunteer centre

At the MUNI HELPS centre we offer support to those in need

We organize volunteer work using our own mobile app

An integral part of the city

Masaryk University
Centre for Culture, Art
and Events offers
engaging cultural
programming to the
general public

We founded Muniss –
an interuniversity
student contest
focused on urban
development in Brno

In the Vysočina
Region we manage
the University Centre
Telč

University culture

MUNI

Believing in equal opportunity

Everyone has the opportunity to receive an education at MUNI, regardless of their physical condition or social background

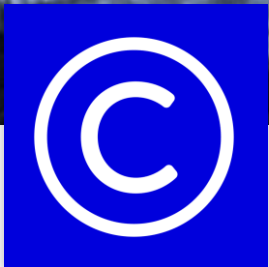

We offer employees flexible hours and the possibility to work from home

We are establishing the position of ombuds to protect people's rights

Promoting transparency

We developed [Theses.cz](#), a plagiarism checker

We were the first university in the Czech Republic to make all theses available on the internet

For nearly 25 years, all academic-related issues have been dealt with online

Thinking and acting sustainably

We help students implement projects promoting sustainability through our community fund

More than 50 % of University buildings are smart buildings

Many of our promotional materials are made by small regional companies and sheltered workshops

The University as part of Brno and the South Moravia Region

MUNI

Brno: A university city

Besides Masaryk University, there are 10 other universities in Brno

When school is in session, every sixth inhabitant of Brno is a university student

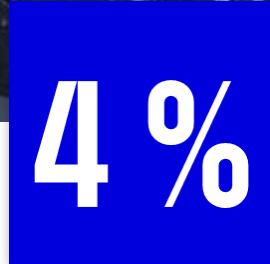

10

According to international student rankings, Brno is one of the top 10 student cities in the world

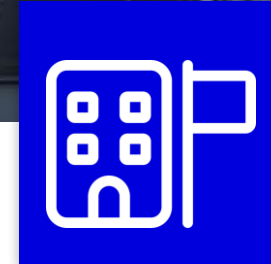

Brno: A science hub

Brno is one of the most progressive science and innovation centres in Europe

4 percent of all employed people in the region work in research and development

4 centres of excellence and 11 application-focused regional centres are located in the region

Ten faculties,
one university

MASARYKOVA UNIVERZITA

MUNI

The Faculty of Law

1919

We have been providing legal education since 1919

We engage in international cooperation with institutes around the world

We possess one of the largest legal libraries in Europe

The Faculty of Medicine

S I M U

We operate the largest, most cutting-edge medical simulation centre in Europe

We develop innovative medical procedures as part of biomedical research

P - P O O L

We offer a unique academic programme with a special focus on research: [P-Pool](#)

The Faculty of Science

1 S T

We are the first faculty of science established in Czechia

We are the only faculty in the Czech Republic to conduct research in all the natural sciences and in mathematics

Our students are involved in research, we invest in student projects

The Faculty of Arts

Our archeological institute is a world-leading research centre

H U M E

HUME Lab conducts experimental research in the humanities and social sciences

The Department of Musicology has a cutting-edge recording studio

The Faculty of Education

We raise new generations of teachers, following the latest trends

We have a comprehensive internship system and an extensive network of partner schools

We are the only Czech member of the ETEN organisation, which brings together teacher training institutions

The Faculty of Pharmacy

We educate experts on medicaments and everything related to them

We conduct research related to drug development

Graduates work in drug development and in the food and cosmetic industries

The Faculty of Economics and Administration

Thanks to long-term cooperation with partners in the field, our students have interesting internship opportunities

Our students learn to think critically, analyse, and debate

We are a research leader in Czechia thanks to our experimental economic laboratory

The Faculty of Informatics

Founded in 1994 as the first independent faculty of this type in Czechia

Students can benefit from our long-term collaboration with industry partners

IS

We administer and develop the MU Information System

The Faculty of Social Studies

We provide expert opinions on issues affecting all of society

We publish a journal indexed in the prestigious Web of Science

We operate Radio R, the largest student radio station in Central Europe

The Faculty of Sports Studies

Our students see being physically active as an essential part of their future career

We collaborate with external partners in education, science, and research

In our labs, we diagnose not only top athletes but also the general public
